

**NOTICE PK/201/15 – Visit to the beach**

Monterrico, November 10<sup>th</sup>, 2015

Dear Parents,

We have just started our last annual project called: “***Taking care of and exploring our sea***”, where we will investigate about animal life in the oceans and will identify some factors that could be contributing to contamination of the sea. This activity will integrate the areas of English and Communication (Spanish) in order to work this topic. We hope this to be an opportunity to speak about the different manners that all of us can contribute to keep the ocean clean and healthy, to sea creatures and human beings, as well.

As part of this project, as every year, we will have a visit to one beach in Costa Verde (Miraflores). We will work a Safety and Hygiene Journal with the children and will conduct research activities in the same beach. The visit will take place according to the following timetable:

- **Pre Kinder A and B**                      **Wednesday, November 18<sup>th</sup>**
- **Pre Kinder C and D**                      **Friday, November 20<sup>th</sup>**

Children will go with their teachers, other invited adults, a nurse and a member of the security team, who will help to guarantee the success of the activity. We request that your children come that day with the school’s uniform (tracksuit) sunblock on and a cap.

Meanwhile, we would appreciate if, at home and with your children, you could look for news or images of life at the beaches and in the sea, so that they can bring them to school.

Sincerely,

Pre-Kinder Homeroom Teachers
